About

I am a Software Engineer with the main focus on C# and .Net. I studied to be a Physicist, but I have ended up with Software Engineering. Currently I am working to get a degree in Business Informatics as well. In my 3 years of experience, I have started from the bottom and thanks to my logical thinking and analytical view, I got higher to be scrum master and lead developer of a small team. Now I am looking for a new job in the hope of new challenges and modern, clean technologies, because Delphi is an outdated language and I would like to change to a modern technology to continue growing as a developer. I prefer .Net and C#, since I am most confident in this technology, because of the numerous trainings in my previous company and my own practices and trainings.

Experience

January 2017 – January 24, 2020 SIS Software Hungary

- medical administration software for private clinics in the USA
- mainly Delphi (75%) and other smaller Java projects (25%) with MsSQL database
- development (50%) and maintenance (50%)
- scrum master for half a year
- lead developer of a small (2-4 developers) team in the last one and half year
- with project owner from the USA and Indian testers
- contacting with clients and clinics in the USA
- in Agile (scrum, scrumban) process (Azure DevOps, JIRA) with Git

Education

- | | |
|-------------|---|
| 2017 - | BSC Business Informatics (long distance education)
Expected graduation in January of 2021
Corvinus University of Budapest |
| 2012 - 2016 | BSC TTK Physics
Budapest University of Technology and Economics |
| 2006 - 2012 | Győr, Révai Miklós High School |

Languages

- | | |
|---------|---|
| English | B2 level exam
Full professional proficiency
Communicative |
| German | B2 level exam
Limited working proficiency |
